

Mathematics 3200

Gonzaga High School

Curriculum Overview

Mathematics 3200 is the third course in the Advanced Program for High School Mathematics in Newfoundland & Labrador. It replaces the previous Mathematics 3205 course. This program is designed to provide students with the mathematical understandings and critical-thinking skills identified for entry into post-secondary programs that require the study of calculus – specifically (but not limited to) the areas of science, mathematics and/or engineering. The Advanced Program aims to prepare students to make connections between mathematics and its applications and to become numerate adults, using mathematics to contribute to society.
